

CONTENTS

Introduction: creating the successful electronic information service ix

1 Introducing the concept of the e-information service 1

What do we mean by an e-information service? 1

Scope 3

Defining your users 3

Pluses and minuses 5

Auditing the electronic service requirement 7

Managing change 9

How to change attitudes and perceptions from the traditional model to the new e-information model 10

Convergence – giving technical skills to librarians and information skills to technical staff 11

The difference the information professional makes – an intelligent filter, a creator of added value 16

Non-work use and 24/7 information centres/libraries: do they have an impact on the e-information service? 16

Summary 17

2 What kind of an e-information service do you want to provide? 19

What an e-information service can offer 19

Organizational needs 22

Information audit and consultancy 22

Customer needs 30
