Preface ix

- Why this book? ix
- Audience xi
- Organization of the book xii
- References and further sources of information xiii

1 Introduction 1

- Overview 1
- Some historical background 2
- What is metadata? 6
- What does metadata look like? 8
- Why is metadata important? 10
- The purposes of metadata 12
- The five-point model 15
- Summary 17
- References and further sources of information 18

2 Describing and expressing metadata 20

- Overview 20
- Describing metadata 20
- Databases of metadata 27
- How to catalogue data 28
- Expressing metadata 29
- Summary 36
- References and further sources of information 37

3 Standards and data models 38

- Overview 38
- Metadata models 38
- About standards 50
- Metadata standards 51
- Summary 61
- References and further sources of information 61

4 Purpose i: Resource description 64

- Overview 64
- Describing resources 64
- Characteristics of metadata elements 65
- Identifier 67
- Title 73
- Creator 74
- Bibliographic citation 76
- Date 76
- Format 77
- Description 77
- Summary 78
- References and further sources of information 79

5 Purpose ii: Information retrieval 80

- Overview 80
- Information retrieval concepts 80
- Retrieval on the internet 84
- Subject indexing and retrieval 88
- Metadata and computational models of retrieval 95
- Summary 98
- References and further sources of information 99

6 Purpose iii: Management of information 101

- Overview 101
- Digital data lifecycles 101
- Records management 102
- Content management 106
- Preservation 109
- Library management 111
- Summary 115
- References and further sources of information 116

7 Purpose iv: Rights management, ownership and authenticity 118

- Overview 118
- Intellectual property rights 118
- Rights management 120
- Provenance 126
- Comparing the models 130
- Summary 131
- References and further sources of information 132

8 Purpose v: Interoperability and e-commerce 134

- Overview 134
- The importance of interoperability 134
- Metadata and interoperability 136
- Management issues 140
- E-commerce 142
- Summary 145
- References and further sources of information 145

9 Managing metadata 147

- Overview 147
- The project lifecycle 148
- Analysing metadata requirements 149
- Selecting and developing metadata schemas 150
- Encoding and maintaining controlled vocabularies 152
- Content rules 154
- Interoperability 156
- Quality management 162
- Search aids and user education 165
- Summary 167
- References and further sources of information 167

10 Looking forward – the future 170

- Overview 170
- Another look at the five-point model 170
- Trends in metadata management 175
- Is metadata here to stay? 176
- What changes? 177
- Summary 178
- References and further sources of information 178
