ISBN: 9781783301249

Published: 18th Jan 2017

Publisher: Facet Publishing

Dimensions: 240mm x 160mm x 18mmmm

Description

The internet as a platform for facilitating human organization without the need for organizations has, through social media, created new challenges for cultural heritage institutions. Challenges include but are not limited to: how to manage copyright, ownership, orphan works, open data access to heritage representations and artefacts, crowdsourcing, cultural heritage amateurs, information as a commodity or information as public domain, sustainable preservation, attitudes towards openness and much more.

Participatory Heritage uses a selection of international case studies to explore these issues and demonstrates that in order for personal and community-based documentation and artefacts to be preserved and included in social and collective histories, individuals and community groups need the technical and knowledge infrastructures of support that formal cultural institutions can provide. In other words, both groups need each other.

Divided into three core sections, this book explores:

- Participants in the preservation of cultural heritage; exploring heritage institutions and organizations, community archives and group
- Challenges; including discussion of giving voices to communities, social inequality, digital archives, data and online sharing
- Solutions; discussing open access and APIs, digital postcards, the case for collaboration, digital storytelling and co-designing heritage practice.

Readership: This book will be useful reading for individuals working in cultural institutions such as libraries, museums, archives and historical societies. It will also be of interest to students taking library, archive and cultural heritage courses.

Author

Henriette Roued-Cunliffe DPhil is an Assistant Professor at the Royal School of Library and Information Science, University of Copenhagen, Denmark. She teaches and researches heritage data and information, and in particular how DIY culture is engaging with cultural heritage online and often outside of institutions. Her website is: roued.com.

Andrea Copeland is an Associate Professor in the Department of Library and Information Science in the School of Informatics and Computing at Indiana University, Indianapolis. Her research focus is public libraries and their relationship with communities, with a current emphasis on connecting the cultural outputs of individuals and community groups to a sustainable preservation infrastructure.
